 If swallowed, seek medical advice immediately and show this container or label.  
 Use only in well-ventilated areas.

**Special precautions:** The International Agency for Research on Cancer has evaluated ethylbenzene and classified it a possible human carcinogen based on sufficient evidence for carcinogenicity in experimental animals, but inadequate evidence for cancer in exposed humans. However, a two year rat and mouse gavage study by the National Toxicology Program on mixed xylene isomers including 17% ethylbenzene showed no evidence of carcinogenicity.  
 Do not spray on a naked flame or any incandescent material.

**Effects of chronic overexposure:** Buildup of explosive mixtures possible without sufficient ventilation.
