SAFETY DATA SHEET

Section 1 - Product and Company Identification

Product Name: Basecoat Reducer

Manufacturer/Supplier:

TRANSTAR AUTOBODY TECHNOLOGIES

2040 Heiserman Dr. Brighton, MI, 48114, USA Product Code: 7411-D, 7414-D

24 Hour Emergency Phone(s): USA 800-424-9300 (CHEMTREC)

International 001-703-527-3887 (CHEMTREC Int'I)

Business Phone: 810-360-1600

SDS Prepared By: Transtar Autobody Technologies

Product Use: Reducer. For Professional and Industrial Use Only.

Not recommended for: Not for sale to the general public

Section 2 - Hazards Identification

Classification of the substance or mixture

GHS Ratings:

Inhalation Toxicity Acute Tox. 4 Gases>2500+<=20000ppm, Vapors>10+<=20mg/l, Dusts&mists>1+<=5mg/l Reversible adverse effects in dermal tissue, Draize score: >= 2.3 < 4.0 or persistent inflammation Eye corrosive 2A Eye irritant: Subcategory 2A, Reversible in 21 days Known to produce heritable mutations in human germ cellsSubcategory 1B, Positive results: In vivo heritable germ cell tests in mammals, Human germ cell tests, In vivo somatic mutagenicity tests, combined with some evidence of germ cell mutagenicity Reproductive toxin 1A Known or presumed to cause effects on human reproduction or on development Organ toxin single exposure 2 Presumed to be harmful to human health- Animal studies with significant toxic effects relevant to humans at generally moderate exposure (guidance) - Human evidence in exceptional cases Organ toxin repeated exposure Aspiration hazard 1 Aspiration Toxicity Category 1: Known (regarded)- human evidence - hydrocarbons with kinematic viscosity ? 20.5 mm2/s at 40° C. Acute toxicity > 1.00 but <= 10.0 mg/l	Flammable liquid	2	Flash point < 23°C and initial boiling point > 35°C (95°F)
Skin corrosive 2 Reversible adverse effects in dermal tissue, Draize score: >= 2.3 < 4.0 or persistent inflammation Eye corrosive 2A Eye irritant: Subcategory 2A, Reversible in 21 days Mutagen 1B Known to produce heritable mutations in human germ cellsSubcategory 1B, Positive results: In vivo heritable germ cell tests in mammals, Human germ cell tests, In vivo somatic mutagenicity tests, combined with some evidence of germ cell mutagenicity Carcinogen 1B Presumed Human Carcinogen, Based on demonstrated animal carcinogenicity Reproductive toxin 1A Known or presumed to cause effects on human reproduction or on development Organ toxin single exposure 2 Presumed to be harmful to human health- Animal studies with significant toxic effects relevant to humans at generally moderate exposure (guidance) - Human evidence in exceptional cases Organ toxin repeated 2 Presumed to be harmful to human health- Animal studies with significant toxic effects relevant to humans at generally moderate exposure (guidance) - Human evidence in exceptional cases Aspiration hazard 1 Aspiration Toxicity Category 1: Known (regarded) - human evidence - hydrocarbons with kinematic viscosity ? 20.5 mm2/s at 40° C. GHS Hazards

H225 Highly flammable liquid and vapor H304 May be fatal if swallowed and

enters airways

GHS Precautions

P101 If medical advice is needed, have product container or label at hand P102 Keep out of reach of children

SDS for: 7411-D, 7414-D Page 1 of 13

H315	Causes skin irritation	P103	Read label before use
H319	Causes serious eye irritation	P201	Obtain special instructions before use
H332	Harmful if inhaled	P202	Do not handle until all safety
H340	May cause genetic defects		precautions have been read and
H350	May cause cancer		understood
H360	May damage fertility or the unborn child	P210	Keep away from heat, hot surfaces,
H371	May cause damage to organs		sparks, open flames and other ignition
H373	May cause damage to organs	Dogo	sources - No smoking
	through prolonged or repeated	P233 P240	Keep container tightly closed
	exposure	F240 	Ground and bond container and
H401	Toxic to aquatic life	P241	receiving equipment Use explosion-proof electrical,
		1211	ventilating, lighting and motorized
			equipment
		P242	Use only non-sparking tools
		P243	Take precautionary measures against
			static discharge
		P260	Do not breathe dust, mist, vapors or
			spray
		P264	Wash contacted skin thoroughly after
			handling
		P270	Do not eat, drink or smoke when using
		D074	this product
		P271	Use only outdoors or in a well-ventilated
		P273	Avoid release to the environment
		P280	Avoid release to the environment
		1 200	Wear protective gloves, protective clothing, eye protection, face protection
			and respiratory protection.
		P321	Specific treatment (see first aid
			instructions on SDS)
		P331	Do NOT induce vomiting
		P362	Take off contaminated clothing and
			wash before reuse
		P301+P310	IF SWALLOWED: Immediately call a
			POISON CENTER or doctor/physician
		P303+P361+P353	IF ON SKIN (or hair): Immediately take
			off all contaminated clothing. Wash skin
		P304+P340	with soap and water.
		1 30411 340	IF INHALED: Remove victim to fresh air and keep at rest in a position
			comfortable for breathing
		P305+P351+P338	IF IN EYES: Rinse continuously with
			water for several minutes. Remove
			contact lenses if present and easy to
			do - continue rinsing
		P309+P311	IF exposed or you feel unwell: Call a
			POISON CENTER or doctor
		P332+P313	If skin irritation occurs: Get medical advice
		P337+P313	If eye irritation persists: Get medical attention.
		P370+P378	In case of fire: Use dry chemical, CO2, foam or water fog to extinguish
		P405	Store locked up
		P403+P235	Store in a well ventilated place. Keep
			cool

SDS for: 7411-D, 7414-D Page 3 of 13

Section 4 - First Aid Measures

INHALATION: If Inhaled: Remove person to fresh air and keep comfortable for breathing. If breathing difficulty persists, seek medical attention.

EYE CONTACT: Rinse continuously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing for a minimum of 15 minutes while holding eye lids open. If eye irritation persist: seek medical attention.

SKIN CONTACT: Take off all contaminated clothing immediately. Wash exposed area thoroughly with soap and water. Seek medical attention if irritation presists. Do NOT use solvents or thinners to wash off.

INGESTION: If swallowed, seek medical attention immediately and have product container or label at hand. DO NOT INDUCE VOMITING unless directed to do so by a physician or poison control center. Never give anything by mouth to an unconscious person.

Most important symptoms and effects, both acute and delayed:

Dizziness, breathing difficulty, headaches, & loss of coordination.

Indication of any immediate medical attention and special treatment needed.

Seek professional medical attention for all over-exposures and/or persistent problems.

Section 5 - Fire Fighting Measures

LEL: 1.0 % UEL: 12.8 %

Extinguishing Media: Dry Chemical, Foam, CO2 or water fog.

Unsuitable Extinguishing Media: High volume water jets

Unusual Fire and Explosion Hazards: Vapors can travel to a source of ignition and flash back. Closed containers may explode when exposed to extreme heat or burst when contaminated with water (CO2 gas evolved). Hazards apply to empty containers. Combustion generates toxic fumes.

Hazardous Combustion Products: oxides of carbon, oxides of nitrogen, formaldehyde, toxic fume

Special Firefighting Procedures: Highly toxic fumes may be generated by thermal decomposition. Water runoff from firefighting can cause environmental damage. Dike and collect water used to fight fire.

Fire Equipment: Full fire fighter equipment including SCBA should be worn to avoid skin contact and inhalation of concentrated vapors. Minimize skin exposure.

Section 6 - Accidental Release Measures

Personal precautions, protective equipment and emergency procedures:

Use personal protective equipment. Avoid breathing vapors and mist. Ensure adequate ventilation. Eliminate all sources of ignition. Evacuate pesonnel to safe areas. Beware of vapors accumulation to form explosive concentrations. Vapors can accumulate in low areas.

For personal protection see section 8.

Environmental precautions:

Prevent further leakage or spillage if safe to do so. Do not let product enter drains.

Methods and materials for containment and cleaning up:

Dike spill area and collect spillage with non-combustible absorbent materials, e.g. sand, earth, vermiculite, diatomaceous earth. Sweep up and dispose of in appropriate containers in accordance to Federal, State and/or Local regulations. Clean preferably with a detergent; avoid use of solvents.

SDS for: 7411-D, 7414-D Page 4 of 13

Section 7 - Handling and Storage

Safe Handling Measures: Avoid contact with skin and eyes. Avoid inhalation of vapor or mist. Ground and bond container and receiving equipment. Use non-sparking tools and explosion proof equipment when handling this material. Keep away from sources of ignition - No Smoking. Use in cool, well-ventilated areas. Keep containers closed when not in use. Take measures to prevent the build up of electrostatic charge. Follow all SDS and label precautions even after container is emptied because they may retain product residues. For precautions see section 2.

Storage Requirements: Keep container tightly closed. Keep away from heat, sparks, open flames and hot surfaces-No Smoking. Store in a cool, dry and well-ventilated place. Do not reuse container when empty.

	Section 8 - Exposure Control and PPE				
Chemical Name / CAS No.	OSHA Exposure Limits	ACGIH Exposure Limits	Other Exposure Limits		
Toluene 108-88-3	200 ppm TWA	20 ppm TWA	NIOSH: 100 ppm TWA; 375 mg/m3 TWA 150 ppm STEL; 560 mg/m3 STEL		
Acetone 67-64-1	1000 ppm TWA; 2400 mg/m3 TWA	750 ppm STEL 500 ppm TWA	NIOSH: 250 ppm TWA; 590 mg/m3 TWA		
Methyl n-Amyl Ketone 110-43-0	100 ppm TWA; 465 mg/m3 TWA	50 ppm TWA	NIOSH: 100 ppm TWA; 465 mg/m3 TWA		
Xylene 1330-20-7	100 ppm TWA; 435 mg/m3 TWA	150 ppm STEL 100 ppm TWA			
Heptane Branched, Linear and Cyclic 426260-76-6	TWA: 500 ppm (as n- heptane) TWA:2000 mg/m3	TWA: 400ppm STEL: 500 ppm (as n- heptane)			
Methyl Isobutyl Ketone 108-10-1	100 ppm TWA; 410 mg/m3 TWA	75 ppm STEL 20 ppm TWA	NIOSH: 50 ppm TWA; 205 mg/m3 TWA 75 ppm STEL; 300 mg/m3 STEL		
n-Butyl Acetate 123-86-4	150 ppm TWA; 710 mg/m3 TWA	200 ppm STEL 150 ppm TWA	NIOSH: 150 ppm TWA; 710 mg/m3 TWA 200 ppm STEL; 950 mg/m3 STEL		
Light Aliphatic Solvent Naphtha (Petroleum) 64742-89-8	PEL =300pm	PEL=300 PPM			
Butyl Propionate 590-01-2			None established.		
Ethylbenzene 100-41-4	100 ppm TWA; 435 mg/m3 TWA	20 ppm TWA	NIOSH: 100 ppm TWA; 435 mg/m3 TWA 125 ppm STEL; 545 mg/m3 STEL		

Engineering Controls: Ground and bond container and reciving equipment. Use explosion proof electrical, ventilation, lighting and motorized equipment. Use non-sparking tools. Ensure adequate ventilation.

Ventilation: General mechanical ventilation or local exhaust should be utilized to keep vapor concentrations below exposure limits (PEL & TLV). Ventilation equipment must be explosion proof.

Safe Work Practices: Eye washes and safety showers in the workplace are recommended. Avoid contact with skin and eyes. Avoid breathing vapors. Wash hands thoroughly after using and before eating, drinking or smoking. Employee education and training in the safe use and handling of this product is required under the OSHA Hazard

SDS for: 7411-D, 7414-D Page 5 of 13

Communication Standard 29CFR1200. Smoking in area where this material is used should be strictly prohibited. Always use protective clothing and equipment. Remove all contaminated clothing and wash thoroughly when finished working. Keep food and drink away from material and from area where material is being used. Spraying of material can cause and oxygen dificient environment. Use proper ventilation to remove vapors, mist and fumes combined with NIOSH approved respirator.

Respiratory Protection: When working with this material use a MSHA/NIOSH approved cartridge respirator or

Respiratory Protection: When working with this material use a MSHA/NIOSH approved cartridge respirator or suitable respiratory protection to keep airborne mists and vapor concentrations below the PEL & TLV limits. When using in poorly ventilated and confined spaces, use a fresh-air supplying respirator or a self-contained breathing apparatus.

Eye/Face Protection: Use safety glasses with chemical splash goggles or faceshield.

Skin Protection: Use chemical resistant gloves.

Body Protection: Impervious clothing, flame retardant antistatic protective clothing. The type of protective equipment must be selected according to the concentration and amount of the dangerous substance at the specific workplace. **Contaminated Gear:** Take off contaminated clothing immediately and wash before reuse.

Section 9 - Physical and Chemical Properties

This mixture typically exhibits the following properties under normal circumstances:

Appearance Clear

Odor Organic Solvent

pH: No data available

Freezing point: No data available

Flash point: -4 F,-20 C

Flammability: No data available

Vapor Pressure: 51.3 mmHg

Density (Lb / Gal) 6.86

Partition coefficient (n- No data available

octanol/water):

Decomposition temperature: No data available

Weight Percent Volatile 99.70

% Weight VOC 78.95

% Wt Exempt VOC 20.75

Physical State Liquid

Odor threshold: No data available

Melting point: No data available

Boiling range: 56°C

Evaporation rate: No data available

Explosive Limits: 1% - 13%

Vapor Density: 3.1

Solubility: No data available

Autoignition temperature: 393°C

Viscosity: No data available

Regulatory Coating VOC 6.90

lb/gal

Actual Coating VOC lb/Gal 5.41

Specific Gravity (SG) 0.822

% Weight Water 0.0

% Vol Exempt VOC 21.53

Section 10 - Stability and Reactivity

Reactivity: No data available

Stability: Stable under recommended storage conditions.

Possibility of hazardous reactions: Vapors may form explosive mixture with air. Hazardous polymerization will not occur.

Conditions to avoid: Heat, flame and sparks. Extreme temperature and direct sunlight.

SDS for: 7411-D, 7414-D Page 6 of 13

Incompatible with:

Strong oxidizing agents, acids, and alkali/base/caustic solutions Mineral acids and strong oxidizers

Hazardous products produced under decomposition:

Carbon Monoxide, Carbon Dioxide.

Section 11 - Toxicological Information

Mixture Toxicity

Oral Toxicity: 3,421mg/kg Inhalation Toxicity: 15mg/L

Component Toxicity

108-88-3 Toluene

Oral: 2,600 mg/kg (Rat) Inhalation: 13 mg/L (Rat)

110-43-0 Methyl n-Amyl Ketone

Oral: 2,080 mg/kg (Rat) Dermal: 3,000 mg/kg (Rabbit) Inhalation: 2,830 ppm (Rat)

123-86-4 n-Butyl Acetate

Inhalation: 29 mg/L (Rat)

64742-89-8 Light Aliphatic Solvent Naphtha (Petroleum)

Oral: 5,000 mg/kg (Mouse) Dermal: 3,000 mg/kg (Rabbit)

100-41-4 Ethylbenzene

Oral: 3,500 mg/kg (Rat) Inhalation: 17 mg/L (Rat)

This mixture has not been tested for toxicological effects.

Acute Effects:

INHALATION - Dizziness, breathing difficulty, headaches, & loss of coordination.

EYE CONTACT - Moderate irritation, tearing, redness, and blurred vision.

SKIN CONTACT - Moderate irritant. Can dry and defat skin causing cracks, irritation, and dermatitis.

INGESTION - Can cause gastrointestinal irritation, vomiting, nausea, & diarrhea.

Chronic Effects:

May affect liver, kidney and central nervous system with repeated exposure. Prolonged or repeated exposure may cause lung injury.

Routes of Entry

Inhalation Skin Contact Eye Contact Ingestion

Target Organs

Blood Eyes Kidneys Liver Lungs Central Nervous System Skin
Peripheral Nervous System Respiratory System Other

Effects of Overexposure

SDS for: 7411-D, 7414-D Page 7 of 13

Short Term Exposure

Ethyl benzene irritates the eyes, skin, and respiratory tract. Exposure to high concentrations can cause dizziness, lightheadedness and unconsciousness. Very high exposures (above the OEL) can cause difficult breathing, narcosis, coma, and even death. Swallowing the liquid may cause aspiration into the lungs, resulting in chemical pneumonitis. May affect the central nervous system. Concentration of 200 ppm can cause irritation. Inhalation: Exposure to vapor can be irritation to the nose and throat. Inhalation of vapor at concentrations above 200 ppm or 3 - 5 minutes can lead to xylene intoxication. Symptoms include headache, dizziness, nausea and vomiting. If exposure should continue, central nervous system depression characterized by shallow breathing and weak pulse can occur. Levels of 230 ppm for 15 minutes may cause lightheadedness without loss of equilibrium. Reversible liver and kidney damage in man has followed exposure to sudden high concentrations of vapor. Such high levels may also give rise to lung congestion. Exposure to extremely high concentrations (10,000 ppm or more) of xylene vapors can lead to a strong narcotic effect with symptoms of slurred speech, stupor fatigue, confusion, unconsciousness, coma, and possible death. Irritates the eyes and respiratory tract. Causes central nervous system depression. High levels of exposure may cause fatigue, weakness, confusion, euphoria, dizziness, headache; dilated pupils, lacrimation (discharge of tears); nervousness, muscle fatique, insomnia; paresthesia; cardiac dysrhythmia, unconsciousness and death may occur. Inhalation: 100 ppm exposure can cause dizziness, drowsiness and hallucinations, 100 - 200 ppm can cause depression, 200 - 500 ppm can cause headaches, nausea, loss of appetite, loss of energy, loss of coordination and coma. In addition to the above, death has resulted from exposure to 10,000 ppm for an unknown time. Skin: Can cause dryness and irritation. Absorption may cause or increase the severity of symptoms listed above. Eyes: Can cause irritation at 300 ppm. Ingestion: Can cause a burning sensation in the mouth and stomach, upper abdominal pain, cough, hoarseness, headache, nausea, loss of appetite, loss of energy, loss of coordination and coma. The substance irritates the eyes, the skin and the respiratory tract. Methyl n-amyl ketone can affect you when breathed in and by passing through your skin. Irritates the eyes and the respiratory tract. May affect the central nervous system. Breathing the vapor can cause dizziness and lightheadedness, and can make you pass out. The substance irritates the eyes, skin, and respiratory tract. High exposures, above the occupational exposure levels, can cause weakness, headache, and drowsiness and may cause unconsciousness. Methyl isobutyl ketone can affect you when breathed in . Exposure to high concentrations can cause you to feel dizzy and lightheaded and to pass out. Breathing the vapor may cause loss of appetite, nausea, vomiting, and diarrhea. Contact or the vapor can irritate the eyes, nose, mouth, throat. Contact can irritate the skin. Ingestion chemical pneumonitis. Contact can irritate the skin. Exposure can irritate the eyes and respiratory tract. Exposure to high concentrations can cause dizziness, lightheadedness, and unconsciousness.

SDS for: 7411-D, 7414-D Page 8 of 13

Long Term Exposure

Repeated or prolonged exposure to the skin may cause drying, scaling and blistering. May cause kidney disease, liver disease, chronic respiratory disease, skin disease, as follows: EB is not nephrotoxic. Concern is expressed because the kidney is the primary route of excretion of EB and its metabolites. EB is not hepatotoxic. Since EB is metabolized by the liver, concern is expressed for these tissues. Exacerbation of pulmonary pathology might occur following exposure to EB. Individuals with impaired pulmonary function might be at risk. EB is a defating agent and may cause dermatitis following prolonged exposure. Individuals with preexisting skin problems may be more sensitive to EB. There is limited evidence that EB may damage the developing fetus, and may cause mutations. Inhalation of xylene vapor and skin contact with liquid are the two most probable routes of long term exposure. Symptoms of inhalation are dizziness, headache and nausea. Long term exposure has been associated with liver and kidney damage, intestinal tract disturbances and central nervous system depression. Prolonged contact with skin can lead to irritation, dryness and cracking. Repeated exposure can cause poor memory, difficulty in concentration, and other brain effects. It can also cause damage to the eye surface. Repeated or prolonged contact with skin may cause dermatitis; drying, cracking, itching, and skin rash. May cause liver, kidney, and brain damage; decreased learning ability, psychological disorders. Levels below 200 ppm may produce headache, tiredness and nausea. From 200 - 750 ppm symptoms may include insomnia, irritability, dizziness, some loss of memory, cause heart palpitations and loss of coordination. Blood effects and anemia have been reported but are probably due to contamination by benzene. Unknown at this time. Causes skin irritation with cracking and drying; destroys the skin's natural oils. May cause liver and kidney damage. May affect the nervous system. n-Butyl acetate may cause skin allergy. n-Butyl acetate has been shown to damage the developing fetus in animals. Prolonged and repeated exposure to butyl acetates can cause defatting, drying and cracking of the skin. Although many solvents and petroleum based products cause lung, brain and nerve damage, these chemicals have not been adequately evaluated to determine these effects. Long-term exposure may damage the liver and kidneys. Repeated or prolonged contact with skin may cause drying and cracking. Repeated skin exposure can cause dryness and skin cracking. This chemical has not been adequately evaluated to determine whether brain or nerve damage could occur with repeated exposure. However, many solvents and other petroleum-based chemicals have been shown to cause such damage. Effects may include reduced memory and concentration, personality changes (withdrawal, irritability), and fatigue, sleep disturbances, reduced coordination, and/or effects on the nerves to the arms and legs (weakness, "pins and needles").

The following chemicals comprise of at least 0.1% of this mixture and are listed and/or classified as carcinogens or potential carcinogens by the NTP, IARC, OSHA (mandatory listing) or ACGIH (optional listing).

<u>Description</u>	% Weight	Carcinogen Rating
Ethylbenzene	1 to 5%	Ethylbenzene: IARC: Possible human carcinogen
		OSHA: listed
Light Aliphatic Solvent Naphtha (Petroleum)	4.1	Light Aliphatic Solvent Naphtha (Petroleum): EU REACH: Present (P)
Methyl Isobutyl Ketone	5 to 10%	Methyl Isobutyl Ketone: IARC: Possible human carcinogen OSHA: listed
	Ethylbenzene Light Aliphatic Solvent Naphtha (Petroleum)	Ethylbenzene 1 to 5% Light Aliphatic Solvent Naphtha 4.1 (Petroleum)

Section 12 - Ecological Information

This material has not been tested for ecological effects.

Persistence and degradability: No data available

SDS for: 7411-D, 7414-D Page 9 of 13

Bioaccumulative potential: No data available

Mobility in soil: No data available

Other adverse effects: Contains photochemically reactive solvent.

Component Ecotoxicity

Toluene 96 Hr LC50 Pimephales promelas: 15.22 - 19.05 mg/L [flow-through] (1 day old);

Section 13 - Disposal Considerations

Product should be disposed of in accordance with all Federal, State and local regulations. Contact a licensed professional waste disposal service to dispose of this material. Subject to hazardous waste generation, treatment, storage and disposal rules under RCRA, 40CFR261.

Section 14 - Transportation Information

The following transportation information is provided based on Transtar Autobody Technologies interpretation of shipping regulations. Each shipper is responsible for identifying, naming, marking and labeling prior to offering for transport.

Agency	Proper Shipping Name	UN Number	Packing Group	Hazard Class
IMDG	Paint Related Material	UN1263	II	3
IATA	Paint Related Material	UN1263	II	3
USDOT	Paint Related Material	UN1263	II	3
	For inner packagings not exceeding 5L each packaged in a strong outer box: Limited Quantity			

Section 15 - Regulatory Information

The information listed in this section is not all inclusive of all regulations for this product or the chemical components of this product.

California Hazardous Substance List:

- None

HAPS: This formulation contains the following HAPS:

100-41-4 Ethylbenzene 1 to 5 %

108-10-1 Methyl Isobutyl Ketone 5 to 10 %

1330-20-7 Xylene 5 to 10 % 108-88-3 Toluene 30 to 40 %

NJ RTK: The following chemicals are listed under New Jersey RTK

142-82-1 n-Heptane 0.2 %

100-41-4 Ethylbenzene 1 to 5 %

590-01-2 Butyl Propionate 3.1 %

123-86-4 n-Butyl Acetate 5 to 10 %

108-10-1 Methyl Isobutyl Ketone 5 to 10 %

1330-20-7 Xylene 5 to 10 %

110-43-0 Methyl n-Amyl Ketone 10 to 20 %

67-64-1 Acetone 20 to 30 %

108-88-3 Toluene 30 to 40 %

California Proposition 65

WARNING: This product contains the following chemical(s) known to the State of California to cause birth defects or other reproductive harm.

108-88-3 Toluene 30 to 40 %
